◆ General Information

Please inspect the product immediately upon receipt for transit damage, missing packs/parts or manufacturing fault. Damage reported later cannot be accepted. Please handle the product with care avoiding knocks and shock loading to all sides and edges of the glass.

Notes: Safety glass can not be re-worked.

Please read these instructions carefully before start of installation.

Special care should be taken when drilling walls to avoid hidden pipes or electrical cables.

Note: This product is heavy and may require two people to install.

Aftercare instructions

After use, your shower should be cleaned with soap and water. This is particularly important in hard water districts where insoluble lime salts may be deposited and allowed to build up. Cleaners of a gritty or abrasive nature should not be used. Care should be taken to avoid contact with strong chemicals such as organic solvents and strippers.

Glass cleaners can be used but with caution, if in doubt contact the manufacturer of the cleaner in question.

Please keep these instructions for aftercare and customer service details.

Tools Required

This product is heavy and may require two people to install.

◆ Assembly Drawing

- [1] 16xRound Screws M4x30
- [2] 1xWall Profile
- [3] 6xWall Plugs
- [4] 1xFixed Panel
- [5] 1xProfile
- [6] 1xProfile
- [7] 1xMagnetic Seal Post
- [8] 1xHandle Set
- [9] 1xDoor Panel
- [10] 6xRound Screws M4x10

- [11] 9xScrew Cover Caps
- [12] 9xScrew Cover Caps Wsaher
- [13] 5xHinge
- [14] 20xScrews M4x18
- [15] 1xF-Wall Profile
- [16] 2xWall Profile Cap
- [17] 2xPost Caps
- [18A] 1xTop PVC strip
- [18B] 1xBottom PVC strip
- [19] 2xU-shaped PVC strip

Installation Steps

Step 1

Mark the location of the wall profile holes on the wall

Step 2

Drill and install wall plugs on the wall

Make sure your measurements are correct and that they match the tub and door before you drill the holes

Step 3

Mark the location of the wall profile holes on the wall

Step 4

Install the top aluminium profile

Step 5

Install the bottom aluminium profile

Put the top aluminium profile well to the 3 holes of front fixed glass .

Fix with screws M4*30

(Noted : The protrusion of the track should be on the groove of front fixed glass)

Step 6

Install magnetic aluminium profile

Put the top aluminium profile well to the 4 holes of magnetic alu.profile.

Fix with screws M4*30

Step 7

Install the panel (B)

Step 8

Install hinges with the profile

Step 9

Install the door

view from room outside

before installation

after installation

Install 5 hinges with the groove of front door. Lock with M4*18 screws .

Step 10

Adjust the shower enclosure

Adjust the level. Drill holes at the wall profile and corner profile separately with $\Phi 3.2$ screws.

Fix the holes with M4*10 screws and caps. (toally 6 holes)

Step 11

Install handle at the door

Install handle at the door. Lock with M4*18 screws (totally 2 screws)
(Note : don't miss 4pcs washers, 2pcs rings)

Step 12

Seal the shower enclosure

All sealant should be applied to the outside.
Seal top to bottom between the wall profile and the wall. Seal the the bottom between the tray/floor and the glass/rail/profile and approx. 50mm vertically between the wall profile and the glass.

Allow 24 hours for silicone to dry before use.

Bracket Installation Instruction

For R-BYT-L130/L140/L150-FFF
For R-BE-L130/L140/L150SG-FFF

Step 13

Cut the support bar as per the length on site

Step 14

Assembly the bracket

Step 15

Mark the position of the bracket

Step 16

Install the wall bracket

Step 17

Install the support bar

Step 18

Fix the clamp

Ø 3.2mm

Countersunk screw
M4*10mm

Deutsch

Die nachfolgenden Pflegehinweise wird empfohlen.

Wichtig ist eine regelmäßige Pflege und Reinigung Ihrer Dusche aus Echt Glas. Es ist sinnvoll Rückstände nach jedem Duschen sofort mit klarem kalten Wasser abzuspülen. Das Abziehen mit einem Glaswischer verhindert das Festsetzen von Kalk. Flecken haben somit keine Chance. Auch die Profile bleiben lange schön, wenn diese mit einem weichen Tuch nach dem Duschen sofort trocken gewischt werden. So wird der Zeit- und Energieaufwand, im Gegensatz zu einer späteren Pflege der Dusche, bereits im Vorfeld enorm gemindert. Zudem wird ein übermäßiger Verbrauch von Putz- und Pflegemitteln auf diese Weise reduziert. Das spart Kosten und schont die Umwelt.

Beim Gebrauch von handelsüblichen Reinigungsmitteln zur Pflege sollten nach Gebrauch mit klarem Wasser komplett abgespült werden, bevor Sie die Dusche trocknen.

Verwenden Sie keinesfalls Scheuermittel, Lösungsmittel und harte scheuernde Schwämme. Denn auch kleinste Beschädigungen und Risse im Glas bieten Kalk und Schmutz einen echten Nährboden, um sich hier festzusetzen. Reinigungsmittel mit einem PH-Wert unter 3 oder über 10 beschädigen Profile, Scharniere, Griffe und Glasbeschichtungen.

Nederlands

De volgende onderhoudstips worden aanbevolen

Het regelmatig onderhouden reinigen zijn van groot belang voor uw douche.

Na het douchen, het materiaal direct afspoelen met koud water en het glas afnemen met een badkamerwisser. Dit voorkomt aanhechting van kalk.

Daarnaast de profielen afdrogen een zachte doek na het douchen. Dus is de tijd en energie, in tegenstelling tot latere onderhoud van de douche, enorm verminderd tevoren. Dit voorkomt overmatige consumptie van reinigings- en verzorgingsproducten wat bespaart en minder schadelijk is voor het milieu. Gebruik geen schuurmiddelen, oplosmiddelen en ruwe schuursponsjes. Dit omdat zelfs de minste schade of barsten in het glas, zorgen voor nesteling van kalk en vuil. Wasmiddelen met een PH- gehalte lager dan 3 of hoger dan 10 beschadigen de profielen, scharnieren, handgrepen en glas coatings.

English

The following care instructions is recommended.

Regular maintenance and cleaning is important for your shower made of glass. It is useful to rinse immediately with plenty of cold water, after every shower. Stripping with a glass wiper prevents the adherence of lime. Spots thus have no chance. The profiles are sure to last, when they are wiped dry immediately with a soft cloth after showering. So is the time and energy, as opposed to later maintenance of the shower,

diminished enormously in advance. In addition, excessive consumption of cleaning and care products is reduced in this way. This saves money and protects the environment.

Do not use abrasives, solvents and harsh abrasive sponges. Because even the slightest damage and cracks in the glass, provide lime and dirt a real breeding ground in order to establish themselves here. Detergents with a PH below 3 or above 10 damage profiles, hinges, handles and glass coatings.

Français

Les instructions d'entretien suivantes sont recommandées.

L'entretien régulier et le nettoyage sont importants pour votre douche en verre. Il est utile de se rincer immédiatement et abondamment avec de résidus d'eau froide après chaque douche. Décapage avec un essuie-glace de verre empêche l'adhérence de la chaux. Spots ont donc aucune chance. Les profils sont sûrs de durer, quand ils sont immédiatement séchés avec un chiffon doux après la douche. Donc, est le temps et de l'énergie, par opposition à l'entretien ultérieur de la douche, diminué énormément à l'avance. En outre, la consommation excessive de nettoyage et d'entretien est réduite de cette manière. Cela permet d'économiser de l'argent et protège l'environnement.

Ne pas utiliser de produits abrasifs, des solvants et des éponges abrasifs. Parce que même le moindre dommage et des fissures dans le verre fournissent la chaux et la saleté d'un véritable terrain pour se mettre en place ici. Détergents avec un PH inférieur à 3 ou supérieur à 10 profils de dommages, des charnières, des poignées et des revêtements en verre.
